

2. Centurion Therapulse

The Centurion Therapulse is a battery operated unit which contains 10 coils and can be used to treat all of the body at the same time. The blanket is constructed of a heavy cotton twill for standing up to lots of wear and tear. A very popular model because of its ease of use and no wires into the stalls. A power supply nearby is not necessary. 3 Settings to help bring an area through the healing process.

1. Low - 2 Hz. - Pain & Inflammation
2. Medium - 15 Hz. - Stimulation
3. High - 30 Hz. - Increase Circulation
